Item number: 1.13.0094.10507

The Ixxat FRC-EP190 FlexRay Plus 4 is a powerful solution for automotive uses. It features eight CAN channels, thereof four CAN FD and two CAN low-speed capable. Additionally, it offers FlexRay, LIN and Digital in/out functionalities. This makes it an ideal solution for logging, gateway, and residual bus simulation tasks. Configuration is easily done with the Ixxat Advanced Configuration Tool (ACT).

Configurable automotive platform (1x FlexRay, 8x CAN, thereof 4x CAN FD)

#### Features and benefits

- Go-to solution for demanding network requirements

  Enables easy integration of multiple bus systems into a single, compact device. This is essential for e-mobility projects and complex industrial applications.
- Improved data management for efficient engineering Streamlines data management and protocol handling, optimized for automotive testing, logging and gateway operations. Ensuring easy integration and reliable performance.
- Overvoltage protection
  Galvanic isolation safeguards against overvoltage and protects from potential electrical damage.
- Multi-connectivity with various interfaces

  Additional interfaces included: 2 x LIN, 1 x Ethernet (10/100 Base-T), 4 x Digital in/out (A/E), USB 2.0 device and host and a SDHC slot. Further extension options are available.
- Embedded platform with own processing power

  All applications run on the device, a PC is only needed for configuration or stimulation/visualization of data, as the actual intelligence is outsourced to the embedded platform.
- Quick and easy configuration through ACT support

  The FRC-EP series is supported by the Ixxat ACT (Advanced Configuration Tool), a Windows-based tool to easily configure the device via drag and drop. Most use cases can be solved by using ACT Freeware.
